

Cure Violence Assessment Visit

The Cure Violence Training & Technical Assistance Team conducts assessment visits with all interested communities that have demonstrated necessary buy-in from essential stakeholders and leadership. While the 2-3 day assessment visit is adaptable to each community, the visit typically includes a Cure Violence 101 Workshop with representation from key entities and/or government agencies and community-based organizations, data review meetings, community partner meetings, meetings with potential workers, and community engagement. This process familiarizes stakeholders and community organizations with the Cure Violence Model and focuses on determining potential target areas, partnerships, workers, and program structures for future implementation. The Cure Violence team can also conduct a thorough assessment of current outreach programming to determine their credibility, capacity, and skills to work with those at highest risk and ability intervene in potential violence using the health approach. Following the visit, Cure Violence will provide a detailed report that includes:

- Data Analysis
 - Potential target area(s) review
 - Level of violence (rates, groups, locations, underlying factors)
- Review of Meetings/Presentations
 - Key findings that could positively or negatively impact pre-implementation/implementation
 - Recommendations re: role(s) of key stakeholders
 - Possible adaptations (school, hospital)
- Next Steps
 - Opportunities for Implementation
 - Challenges to Implementation
 - Recommendations
 - Level of intervention (target area, multiple epicenters, citywide)
 - Tentative staffing patterns
 - Recommendations for recruitment planning
 - Cost

Estimated Cost of Assessment Visit: \$7,500
